

VERGDC Replacement Light Fitting Instructions

Note : You **MUST** ensure the unit is unplugged from the mains whilst replacing it.

Step 1 Locate the current light fitting at the top of the VERGDC

Step 2 Unscrew and remove the cover between the old dimmer unit and old transformer unit.

Step 3 Unscrew and remove the old dimmer unit and old transformer unit.

Step 4 Unplug the bulb unit connector.

Step 5 Cut the old switch hinge wire (This is no longer required)

Step 6 Place the new unit in the recess and re-screw down

Step 7 Replace the cover (the one removed in Step 2)

Step 8 Reconnect the bulb unit connector to the new unit. (Make sure the clip is fastened securely like the image below)

Step 9 That's it. The unit can now be switched on or off using the inline rocker switch located near the plug.
